

# HUB happenings

Sumner Academy | Issue 02 | August 2022

We saw several groups of students coming in to the HUB during the month of August!

7th Grade Social Studies students were challenged to design, build, and test Paleolithic type stone tools. They were not allowed to use modern technology in their construction, and they had to thoroughly explore the relationship between form and function in their design. While they may not have made it during this time in history, they did learn a thing or two about working with natural materials!

"Sometimes the best technology is a roll of duct tape...or a rock!"

ACADEMY

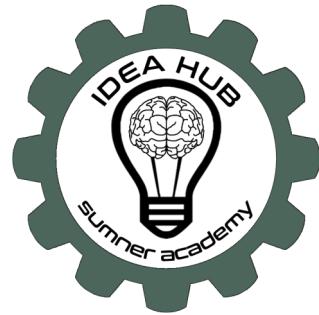

Thank you for all of the donations from the Amazon Wish List! There are still a few more items left that we could use for upcoming student projects, so please check back on the list! I do keep it updated as needs arise.

## Upcoming Events

We have a booked September in the HUB! Kindergarten, 1st Grade, 3rd Grade, 4th Grade, and 6th Grade are all scheduled to come in to the space for various projects.

Classes include science, math and social studies!

The 6th grade social studies class came in to the space to design and create a three-dimensional representation of a country of their choice. The challenge was to highlight that country's greatest landforms. Students used the 3D pens to build mountains, Wiki Stix to build rivers, and lots and lots of Styrofoam, paint, and other creative crafting materials to construct their maps!

8th Grade students also used the HUB space to collaborate and work out a solution for building part of their set for the upcoming Shakespeare play. Be sure to check out those clouds when you go see the play!

### Launch of the First Lego League Challenge Team!

Mrs. Ball and Mrs. Linville are proud to announce the launch of our competitive robotics team! We will be competing in the First Lego League Challenge program. This is for middle school students who want to learn more about teamwork, robotics, and programming!
