

# HUB happenings

Sumner Academy | Issue 04 | October 2022

Even though we were only in session for two weeks this month, we still had plenty of student activities!

3rd Grade students worked on designing their own cookie cutters for their LC3 Auction basket.

“Curie” and “Jarvis” were back in action 3D printing the student designs, and the students couldn’t stop watching them work!

Pre-K students were challenged to build the ultimate pumpkin harvester!

They had to brainstorm and design their own device to help them pick as many pumpkins as they could from our model pumpkin patch. They came up with some imaginative ideas!

SUMNER  
ACADEMY

I have been fortunate enough to complete site visits to other independent schools in surrounding counties. I have gained valuable insight into managing and maintaining spaces that are focused on student tinkering and designing. If you have any suggestions for places I could visit, please let me know. I hope to incorporate some of these methods and systems into our own space over the coming months!

## Upcoming Events

Be sure to check out the HUB inspired Auction items!
